CARDINAL COMMERCE ADDITIONAL PARAMETERS

Additional parameters for calling Paygate interface for credit cards

Customer authentication by Cardinal Commerce is an additional function for credit cards with 3D Secure security, i.e. Verified by Visa, SecureCode for MasterCard/Maestro and American Express SafeKey. This relates to Paygates payssl.aspx interface and to the GICC protocol.

Please check the credit card handbook for general and other special parameters for making a credit card payment via the payssl.aspx interface.

Notice: For security reasons, Paygate rejects all payment requests with formatting errors. Therefore please use the correct data type for each parameter.

The following table describes the encrypted payment request parameters:

Parameter	Format	CND	Description
Cardinal Commerce Customer authentication			
Channel	a..10	O	Channel for processing this order. Allowed values are WEBSITE, MOTO, RE-TAIL and MOBILE_APP.
FirstName	ans..50	O	First name of the customer
