## Cash-In/Bill Payment

Computop Paygate supports more than 150 payment methods, including Boleto Bancario. This is a popular voucher payment method in Brazil. Customers receive a barcode receipt via email after they make a purchase, which they print out. They can then take the receipt to a bank or post office branch, supermarket or lottery

counter and settle the balance in cash. Payments can also be made via bank transfer. It can take a few days to inform the retailer of the payment, but express options like Boleto Flash can reduce this time to less than one day.
