

Online Bank Transfer

Computop provides more than 150 payment methods including eps. In Austria, online transfers using eps (Electronic Payment Standard) are widespread in e-commerce and, as such, represent a useful addition to your portfolio of payment types. eps increases the likelihood of attracting purchasers and is easy to use, whilst offering high levels of security. Your customers select their bank during check-out and complete the

ordering process via their online banking portal. They then receive confirmation of payment immediately after sending their payment. When making payments via eps, you benefit from a payment guarantee, meaning you can be absolutely certain that you will receive your money. There is no risk of non-payment or chargebacks.
