

Prepaid

Computop provides more than 150 payment methods including paysafecard. Accepted in eight transaction currencies and more than 30 countries, including the eurozone and the USA, paysafecard allows for speedy internationalisation. Since it operates entirely without the personal data of the consumer, it is ideal

for industries whose customers value their anonymity. Young people who do not have access to either a credit card or a bank account can make payments with paysafecard too. The cards are retailed at values of between five and 100 euros, and up to ten cards can be redeemed in one transaction.
